ORIGINS LIVING®

INSTALLATION INSTRUCTIONS FOR NON-ILLUMINATED MIRRORS

Before starting installation, please make a note of the serial number found on the back of the mirror (begining with NS) and keep in a safe place in case of a future guarantee claim. Read these instructions carefully and keep them for future reference.

1. Unpack the mirror, place it on a soft surface, such as cardboard or a towel. Do not place the mirror on objects with hard surfaces.

2. Measure the fixing distances on the back of the mirror and mark the fixing positions on the wall to the required height position and correct level.

3. Before drilling, ensure there are no hidden pipes or cables behind mounting points.

4. Carefully drill the marked positions on the wall and insert the wall plugs and fixings into the new holes. Ensure that the correct size drill bit is used.

5. Carefully hang the mirror on the wall fixings and check it is securely supported and level.

CARE INSTRUCTIONS

Never use abrasives, bleach, solvents, descaling products or acids when cleaning the mirror.

Carefully clean the mirror using a soft, damp or microfibre cloth. For larger stains use good quality, readily available non-aggressive glass and mirror cleaning agents. The mirror should then be dried with a soft dry cloth. The back of the mirror should only be cleaned with a soft dry cloth without any cleaning agents to avoid the silver layer from corroding.
